

Milk powder

Milchwerke "Mittelelbe" produces a large variety of spray dried milk powders.

At the company site in Stendal whole milk as well as skimmed milk powders are manufactured in different grades and qualities and in variations such as instant, lactose free (< 0,1% in powder), lactose reduced (<10% in powder), low-spores and organic. All the instant powders have a very good solubility. On special request the milk powders can be enriched with vitamins or other minerals.

Possible applications for our milk powders are for example chocolates, pastries, ice creams and convenience products such as soups, sauces and desserts. Low-spores, lactose free and lactose reduced powders can also be used in nutritional applications.

Product benefits:

- lactose free and low lactose variations
- organic- and low-spores qualities
- low to medium free fats
- instant powders with good solubility
- high heat resistance
